Things seem to be pretty quiet, until the mercenary son of a notorious ex-President has been murdered. Frank (Sonny Palacios), former Cuban sniper, investigates on the island, where he is soon involved with his beautiful neighbor, Graciela (Karin Viard), who is believed to have a personal vendetta against the assassin's father. The killer is working in the shadows, moving from town to town, and leaving his mark. Sonny can't help but wonder if he's up against the mob. As the series progresses, Sonny is forced to contend with much more than bullets and arrows. This invention relates to a wheeled vehicle such as a motorcycle. More specifically, it relates to a steering apparatus for a wheeled vehicle. There are several kinds of steering systems in use for vehicles such as motorcycles. Generally, in these systems, a handlebar has a grip portion and a steering portion. The grip portion is attached to a handlebar so that the handlebar and grip portion extend in a transverse direction of the vehicle. The steering portion is connected to the handlebar at a point on the handlebar that is generally in the vicinity of the grip portion. For example, the steering portion may be located about one-third the distance from the grip portion in a transverse direction of the vehicle. These conventional steering systems generally require the rider to apply a force in a transverse direction in order to turn the vehicle. In order to accomplish this, the rider must pull the handlebar to the right or pull it to the left, respectively, in order to cause the steering portion to turn. Typically, the handlebar is connected to the handlebar grip portion by a pair of cross members or a single cross member that extends in the transverse direction. These steering systems do not provide a compact design in the transverse direction of the vehicle. More specifically, the handlebar extends along the transverse direction of the vehicle.
